## PROJECTS

Temperature Converter.

- The Temperature Converter project is a desktop application developed using Java Swing.
- It allows users to convert temperature values between Celsius, Fahrenheit, and Kelvin.
- The application features a straightforward and user-friendly graphical user interface (GUI) ensures ease of use for anyone needing quick temperature conversions.
- [GitHub Repository Link](#)

Weather Website.

- This project is a dynamic and interactive weather website created using HTML, CSS, and JavaScript.
- Leverages the OpenWeatherMap API to fetch real-time weather data for any location in the world.
- Designed to provide users with an intuitive and visually appealing interface.
- Allows users to check current weather conditions, forecasts, and other meteorological information.
- [GitHub Repository Link](#)

Dental Clinic Management.

- Developed a sophisticated web-based application using HTML, CSS, and Django.
  - Automated and streamlined day-to-day operations of a dental clinic.
  - Managed patient records, scheduled appointments, and tracked treatment histories.
  - Enhanced efficiency, accuracy, and quality of dental clinic services.
